Aluminium - Slim Windows & Doors

One big trend is the move toward large modern windows that span the entirety of a wall.

We are specialized in slim Doors and Windows - Floor to Ceiling featuring minimalist frames, recessed bottom track with bigger glasses for wide open view

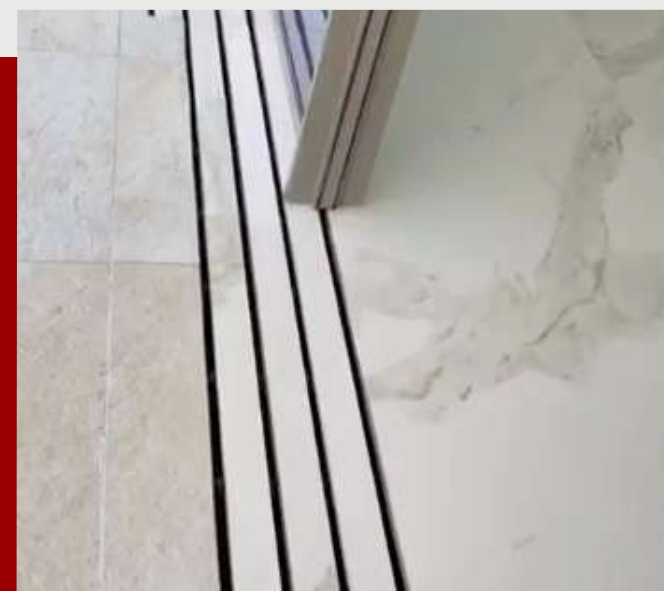

Wide open window means more glass hence considering Extreme Summer / Winter seasons - thermal insulation and low-E coated glass is being added to minimize ultra violet and infrared light from the sun

 Maximum Choice of Colours	 Eco-Friendly	 Slim Profile	 Effortless Movement
 Automation	 Dust Proof	 Zero Water Penetration	 Sound Insulation
 Customized Sizes	 Low Maintenance	 All Season Durable	 Thermal Transmission

Slim Sliding Windows

Features

- Slim / Minimal profile for bigger windows - "get maximum outdoor view"
- Integrated Concealed Drainage - "incase of rain or regular wash water will drain"
- Multi Locking - "provide extra safety to your home"
- Corner slider with no verticals at closing point - "get full access to your open space"
- Frame can be recessed - "will get unobstructed view"
- Automatic operation
"integration with home System can give effortless opening or closing"

Are you making a modern home or ready to modernize your existing home with new slim windows?

Contact us to review all to achieve the right look for you.

Bi- Fold & Pivot Doors

Bi fold doors are easy, elegant, and fun to operate. Undo the lock and pull the handle.

Bifold doors move smoothly on a top or bottom track and "accordion" together with little effort.

Your bifold door system can also include an optional swing door at one end, which allows quick, easy in/out access without having to open the full door system.

Bi-fold doors are a popular choice when looking to maximise space and light. The design can literally open up an entire wall of glass, connecting the inside to the outside with a level threshold. Aluminium bi-fold doors offer both high performance and superb thermal efficiency.

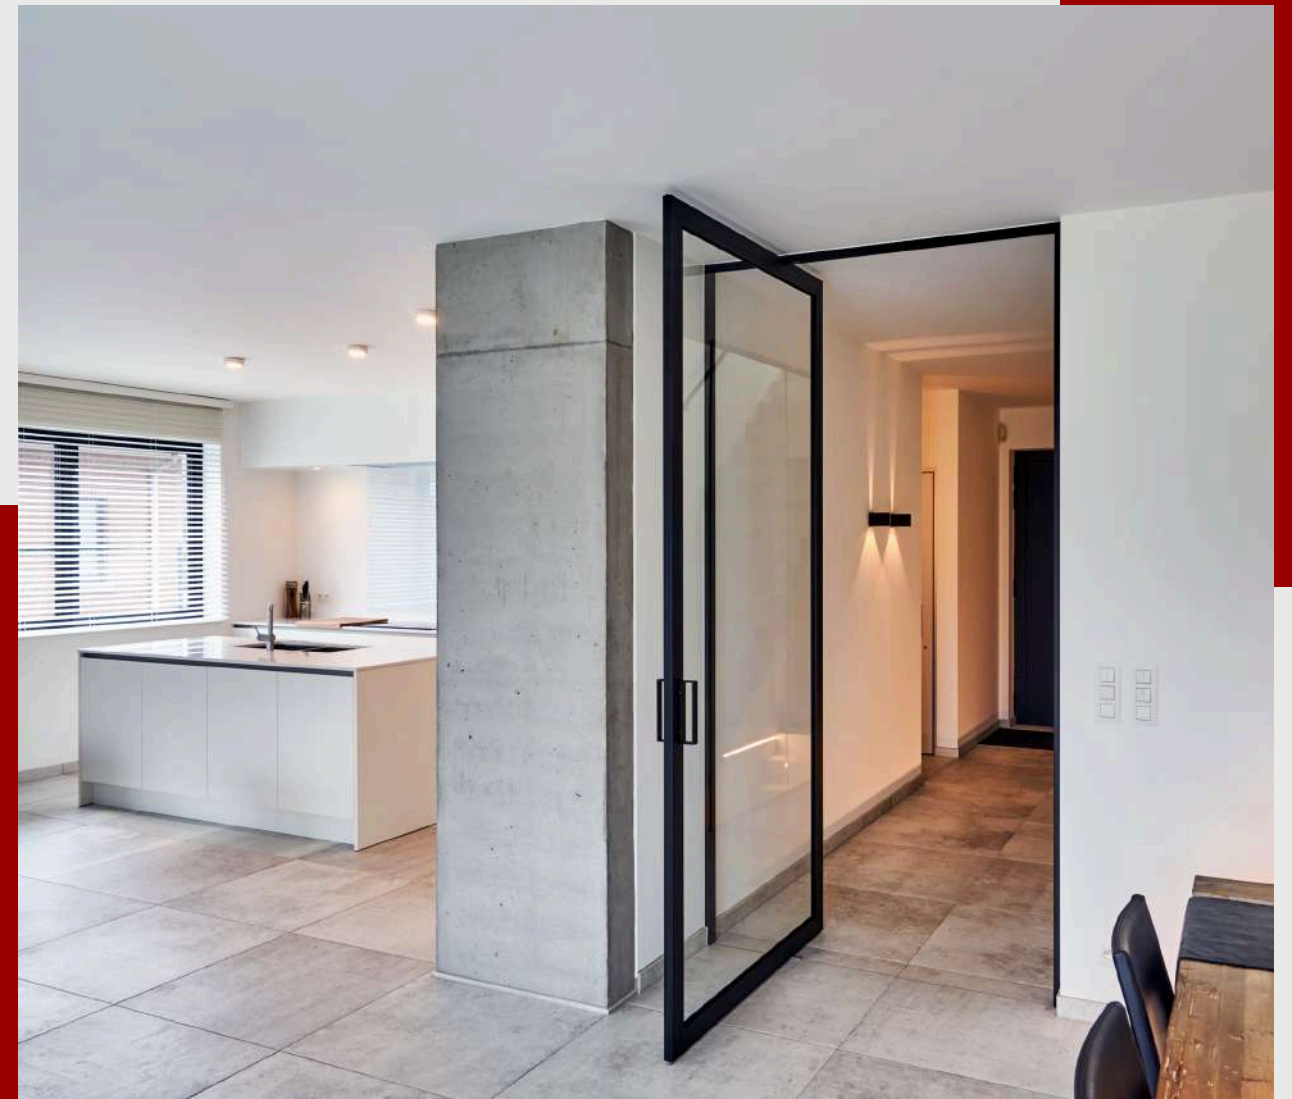

Pivot Doors

A pivot door is a frameless swinging door designed to rotate 360 degrees in its vertical axis on a pivotal box. The pivot hinges are positioned at the top and bottom of the door.

Strong and Stable - A pivot door opens and closes through a pivot installed beneath the door, which carries the weight of the door.

Modern and Appealing - Pivot doors are sleek, stylish, and make a bold and contemporary design statement. The wide opening of this type of door provides a luxurious feel.

Customizable - you can customize them in any manner you want. This gives you the freedom to express your unique style and taste.

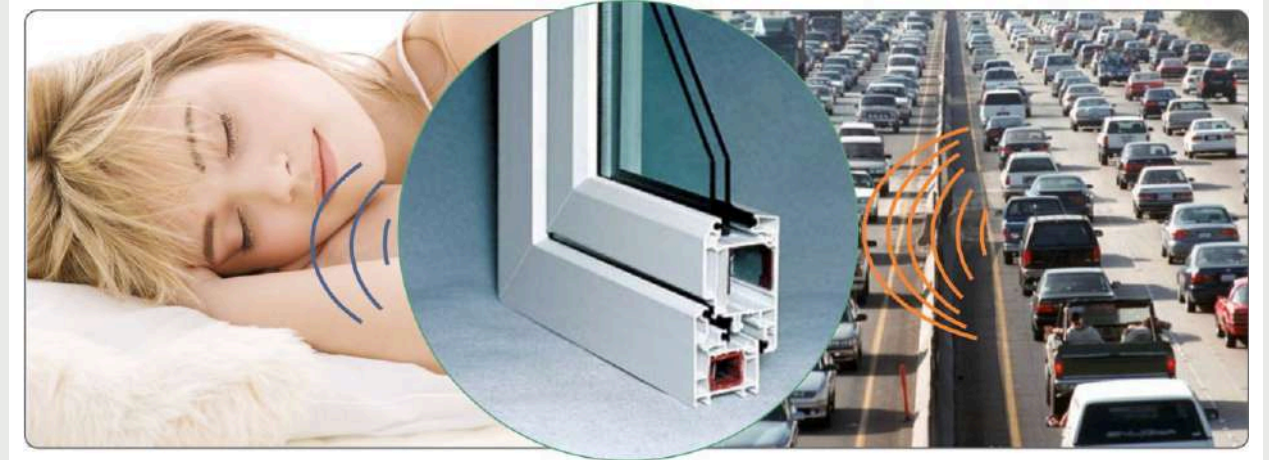

uPVC Windows & Doors

uPVC windows are very popular right now for some of the following reasons

- Great amount of thermal efficiency "helping to keep energy bills down"
- An environment friendly product - 100% recycled "your contribution towards saving environment"
- A wide range of colours, styles and finishes, with different Typology "Customize as per the choice"

Bigger the Better

The main door of our house should be bigger than any other door of the home.

Beautiful and Vibrant

Beautiful and a vibrant surrounding gives us and our family happy and pleasant feelings while coming or going out of the house.

Decorating the Door

Good decorations of the main door freshen up the mind of the people living there.

Best Material for the Door

Our decorative main door for the entrance is strong and sturdy.

“Entrance is believed to be the gateway to success. It has a great importance, as this place energizes entry and exit. Moreover, the main entrance creates the first impression of a house or commercial.”

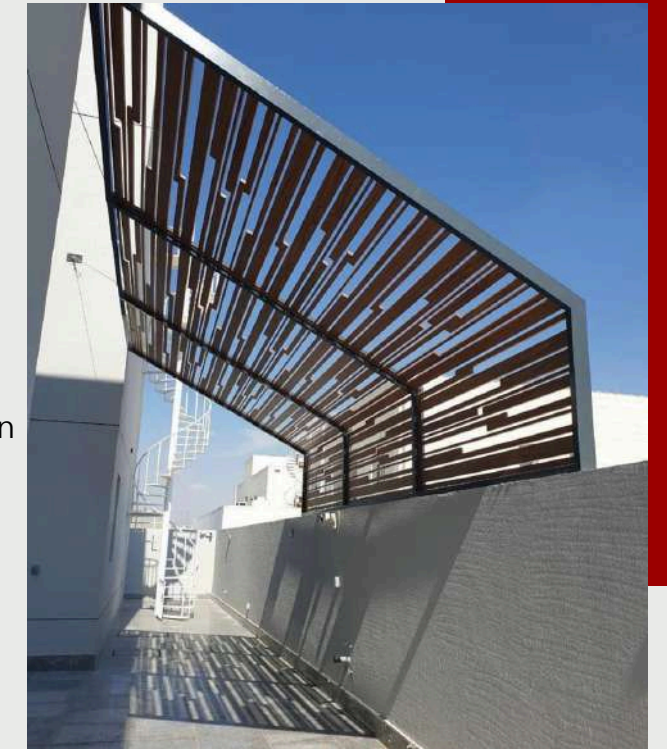

Gazebo, Pergola & Parking Shade's

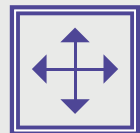

Typically rectangular, with a support post at each corner and a slatted roof. These are being used as a design element providing shades at areas like parking, entertainment, outdoor dining etc.

Following special characteristics has increased their popularity among all out door lovers undoubtedly.

- All-weather resistance
- Light in weight
- Choice of design and customization
- Adequate strength
- Durability & longevity
- Easy or Almost no maintenance.
